

# Contour Lines Corp

## WORKING AGREEMENT FOR AGROFORESTRY PROJECT

Contour Lines Corp ("Contour Lines") is a non-profit organization dedicated to agroforestry. We achieve our goal by working with landowner organizations or individuals ("project recipients") that understand and comply with the following agreement.

This signed contract has the objective of communicating both parties' responsibilities for a successful Contour Lines project for the benefit of all. By signing, the project recipient and Contour Lines accept these rules of cooperation.

Contour Lines exists and provides projects thanks to international support. This support is conditional on our fulfilling what we promised: establishing agroforestry systems planted on contour.

What we offer:

- Trees
- Technical training
  - site design, excavator training, tree planting and maintenance.

The recipient, \_\_\_\_\_ (name), residing at \_\_\_\_\_  
\_\_\_\_\_ (address) are beneficiaries of the Contour Lines Agroforestry Project.

We certify that we received the project voluntarily, we understand its objectives, and we are willing to comply with the following requirements:

The agricultural methods:

1. Excavate swales and construct berms on contour. (Provide equipment and operator)
2. Plant and maintain support trees on contour, to provide shade and compost.
3. Keep soil covered with mulch and cover crops.
4. Clean organically: with mechanical tools and equipment, without herbicides.

Organizational methods

1. Include the whole family: women have equal right to participate in work days, attend talks and solicit their own projects.
2. Support efficient work: have someone responsive to facilitate communication with Contour Lines, collaborate with meals and potentially lodging for Contour Lines extensionists during site visits, and organize a group of helpers (3-5) to participate on work days.

Project Recipients: \_\_\_\_\_ and \_\_\_\_\_

Contour Lines Representative: \_\_\_\_\_

Place and date: \_\_\_\_\_
